**Bafang BT F07, BT F08, BT F09 – Two new batteries for semi-integration into lightweight e-bike frames plus a new long range battery for the M800 system**

In addition to its various drive system options – front, rear and mid motors – Bafang now extends its own battery portfolio to offer not only rack mounted and fully integrated inTube batteries, but also semi-integrated batteries for an even greater variety of frame designs

*Wijchen (NL), August 27<sup>th</sup>, 2019* – Bafang, one of the leading manufacturers of e-mobility components and complete drive systems, expands its battery collection for e-bikes with the introduction of two new models for down tube applications, BT F07.450.C and BT F08.600.C, offering 450Wh or 600Wh energy content respectively.

With these two new versions Bafang can now also offer an in-house solution for customers looking for downtube or other positions of a battery. Besides it is still possible to implement Bafang's so-called "open system" which allows the combination of motors, controllers, sensors, displays and batteries from different (Bafang) series or even other suppliers. Due to their multitudinous development team of more than 40 engineers, Bafang can support its customers by securing perfect interaction between all those components.

But there are also good reasons for relying on just one supplier of a complete drive system – and therefore for Bafang to develop and introduce the new batteries. Both versions, complementing now a range of nine battery types and sizes, apply the same design and main technical features:

- Premium battery cells (type 18650)
- Semi-integration into the frame's downtube
- Demounting sideways (to the left)

POWER YOUR LIFE

- Charging on/off the bike – with two charger options to choose from (2A/3A charging current)
- Capacity indicators (LED) on top of the battery
- Production colour: black with optional decals

Technical data	BT F07.450.C	BT F08.600.C
Nominal voltage	43V	43V
Nominal capacity	10.5Ah	14.0Ah
Energy content	450Wh	600Wh
Charging time (charge current)	5.5h (2A)	5h (3A)
Dimension (L*W*H)	334*86*73mm	334*86*89mm
Weight	3.0kg	4.0kg

### INTUBE BATTERY BT F09 for M800 drive train system

The current 200Wh BT F05 will soon receive a larger cousin – the 430Wh BT F09. High energy density, even greater mileage, long service life are all but good reasons to go for a bit more capacity. Aerodynamic low-profile design, with a mere 2.3kg still on the light side of things plus easy handling and (dis-)assembly. Perfect for Endurance eRoad or eGravel bikes, yet also for sleek flat handlebar Urban or Cross bikes.

The new batteries will be available for Bafang OE customers as of Q4 2019.

POWER YOUR LIFE

**About BAFANG: [www.bafang-e.com](http://www.bafang-e.com)**

Bafang, one of the leading manufacturers of e-mobility components and complete e-drive systems, has been developing components and complete systems for electric vehicles since 2003.

The company focuses on all global e-mobility trends of the future: be it as an individual e-bike, e-scooter or for public bike sharing schemes. Bafang employs more than 450 staff worldwide in four locations. The head office, development and manufacturing center is based in Suzhou, near Shanghai.

Bafang has Sales and Service Centers in the Netherlands, in the USA and in Germany.
