

Press release

Bafang presents the solid, reliable drive solutions demanded by the heavy-duty cargo bike market!

Automated transmission, smooth reverse function and powerful motor sit at the heart of Bafang's heavy-duty cargo bike complete system

Suzhou, April 2022 - The latest market studies by major e-bicycle associations clearly show a steady growth in the e-cargo bike sector, which will continue to increase in coming years. In particular, the segment of heavy, commercially used e-cargo bikes (payload between 500kg and 1to), is causing many an engineer a headache in terms of selecting the most suitable and durable drive concept. Bafang is working very intensively on developing solutions to meet the requirements that are placed on these "last-mile" transport vehicles, which in turn are helping to meet requirements around the world for CO₂ emissions reduction. Through close exchange between the R&D department, users and manufacturers, Bafang gained valuable knowledge and insights, for the effective investigation and development of a new technical milestone.

About BAFANG: www.bafang-e.com

Bafang, one of the leading manufacturers of e-mobility components and e-drive systems, has been developing components and complete systems for electric vehicles since 2003. The company is listed on the Shanghai Stock Exchange (603489.SS) and focuses on all global e-mobility trends of the future: be it individual e-bikes, e-scooters or for public bike sharing systems. Bafang employs over 1000 people at ten international locations worldwide. The headquarters, development and production centre are located in Suzhou, in the immediate vicinity of Shanghai/China.

Bafang has sales and service centres in the Netherlands, the USA, Germany, Denmark, France, Italy, Japan, and Taiwan/China. The newly opened plant in Poland focuses on the production of mid-motor systems for the European markets.
